

Email Signature Template

Creating your email signature is another way to create consistent branding for your name and business. To ensure that your brand is consistent, we personally recommend that you create an effective presence on line as well as off line. If you want to build a solid network and net worth, you must maximize every exposure to expand your brand.

I suggest using the following as a template:

First Name M.I. Last Name

Official Title(s)

Business Name

Tagline or Incredible Factor Power Statement

Website

Blog (if separate from website)

www.facebook.com/yourname

www.twitter.com/yourname

www.linkedin.com/in/yourname

www.youtube.com/yourname
